MD's Note

Rakesh Sharma

Alert Golf (AG) was established in 1998 as a solution provider company for Golf & Tourism industry. In 2017, we transformed ourselves into “AG Group-AG Horizon Pvt. Ltd.” and marked our presence in the world of consultancy service providers. Since then, we are excelling every day towards providing innovative and engaging solutions to challenging mega projects across India. Our dedication bagged us with the “Leaders Awards” as **Start-up Company of the year-2021 (Multifunctional Professional Services)** in the challenging times of COVID 19.

AG Group - AG Horizon Pvt. Ltd. serves the quality and enriches the diversity with creativity and transparency at the core. We work seamlessly for efficient management programs to outperform in this highly competitive world. Reliability in our team efforts is our uniqueness. To celebrate this motivating spirit and our past achievements, we are releasing this newsletter to our readers. To be in line with the vision of the Government of India for Indian companies, we at AG Group - AG Horizon Pvt Ltd. are committed to becoming the leader in the world of consultancy and a great competitor to the global players in the Indian market with our versatile experience and ever charging enthusiasm in near future aiming close to projects worth 1 billion USD this year in our kitty in a short span of time.

Dear Readers, this is just a beginning. AG Group – AG Horizon Pvt Ltd will come forward with the best consultancy solutions and advisory time and again. We will together work for the accomplishment of Sustainable and Atmanirbhar Bharat. Your continuous support will help us to grow stronger and make the global canvas of consultancy more interesting and challenging.

Editor's Note

Seasons Greetings !

We are delighted to bring the first edition of AG Group's Newsletter “**Horizon At a Glance**” to our glorious readers. We are praying for your safety and good health in this tough time of COVID 19.

Welcome to the AG Group Community!

After the successful endeavour of more than two decades, AG group – AG Horizon Pvt. Ltd. is celebrating its team efforts and achievements through this newsletter. While reading this, you will come to know that how AG Group helps in the development of state-of-the-art projects starting Golf and Tourism to multiple sectors, achieving excellence in whatever project we took up.

Amisha Katahra

India's growth story is incomplete, till all its regions are developed equally. So, to be in align with the vision of our Honourable Prime Minister for Indian companies for India's sustainable socio-economic growth, AG Group – AG Horizon Pvt Ltd is contributing to the development of the North East region wholeheartedly. Through our consultancy, we work for the preservation of nature, climate, environment, and life with a parallel focus on livelihood and economic development like water resource projects in the North-Eastern states of India. In this edition, we are excited to share insights of our mega project in the natural valley of Manipur while celebrating World Nature Conservation Day in this first newsletter edition.

Foot Steps

The North-East Region strategically shares international borders with many East Asian countries. Thus, it works as a gateway to the “Act East” policy of the Government of India. Hence, inclusive and parallel growth of this primitive region is a priority for India's growth. To promote this vision in letter and spirit, we at AG Group – AG Horizon Pvt Ltd. are committed to the social, economic, and environmental development of this strategic dominant region of Indian territory.

Water Resource Project, Manipur

AG Group – AG Horizon Pvt Ltd is proudly providing consultancy to the Water Resource Project in the natural valley of Manipur. We are privileged to work with Water Resource Department of the Government of Manipur. Flood has been a perennial phenomenon in the natural valley of Manipur since the very inception of its existence. In the monsoon season, the region sees frequent floods and thus faces the loss of life, and infrastructure time and again. This is constantly hampering the economic development of underdeveloped states like Manipur. Our INR1000 Crores plus ambitious water resource project of the Manipur state government will primarily provide a master plan for prevention and mitigation of the issues related to floods and their impacts in the valley region.

Kick-off meeting at Manipur

systematically address the issues of frequent floods as this impacts a large population of the state. We have incorporated best practices to address the concerns related to flooding followed in other states/locations after established evaluations in terms of timeline, cost, and outcome. We have been entrusted for funding arrangements for this project. During project implementation, it is our primary concern that the project must be environmentally sustainable.

Some of the major challenges addressed by us in this project are:

- Intensive rainfall leading to topsoil erosion, bank erosion, and the meandering tendency of the rivers
- Sedimentation and change in river regime
- Rapid urbanization without planning
- Human occupancy in flood plains of the rivers
- Reclamation of low-lying areas
- Indiscriminate deforestation
- Blocked and choked natural drainage line

Impact

The Benefit-Cost Ratio of this mega project being estimated to be greater than 1, the project will deliver a positive net present value to the clients and its investors. Through this, the AG Group will help the state government to achieve the following outcomes:

- Overall development of river basin
- Stabilization of river banks
- Minimization of the impact of flood damages in the basin
- Minimization of landslides and large scale erosion especially in the hilly areas
- Effective solution to drainage congestion
- Minimization of waterlogging
- Restoration of continuous communication
